### THE PLAIN LAW.

#### The Industrial Department of the Home Must be Run.

The Industrial School in connection with the Orphans' Home at Carson has been closed down indefinitely. Thus the State loses a step in the march of progress.—Enterprise.

The Industrial School in connection with the Orphans' Home was one of the best features of the institution. The building was the gift of the late Senator Sharon and it is a disgrace to Nevada if this school is allowed to fall into disuse. The taxpayers of this State are anxious to know what this means.—APPEAL.

Commenting on this the Gazette says: The statute under which the home was established and is now operated reads: "All Orphans admitted to the State Orphans' Home shall, under the direction of its Board of Directors, be taught the usual branches of an English Education and the male ORPHANS SHALL BE TAUGHT USEFUL TRADES AND OCCUPATIONS." Now by what authority does the Board of Directors close down the industrial department of this institution? The people through legislation in plain terms demand the teaching of useful trades, such as was contemplated by the projectors of this department? If it does not come from the people the Board is without authority, but possibly the Board fears that at the end of two years the funds will be scarce. Because this is possible, must either physical or mental starvation come upon these unfortunate orphans? Has public-spirited, humanity-loving Nevada ever declared a death or other penalty upon its officers for incurring a deficiency bill? Has this State ever refused to pay a deficiency bill that was just and proper, or even so much as censured its officers for incurring such a bill? Much less then would she censure when the act that might call it forth involves the honor of the State and the interests of the humanity. In common with the press of the State as well as the people generally, the Gazette would like to hear from the Board in explanation.

#### The Kentucky Victory.

The later returns from Kentucky have almost paralyzed the Democrats, the heavy Republican gains show how sharply Cleveland's Administration has been rebuked.

The Commercial summary is as follows: Seventy-eight counties have reported so far, leaving forty-one to report. The figures are from the most reliable dispatches, and agree with the returns received at both the Republican and Democratic headquarters. The average Republican gain, per county, from the reports so far received, 325. On the same ratio the Republican gain of the whole State will be 3,867. This will leave a majority for Buckner in the counting. The gross Republican gain so far as heard from is 25,000. Six counties show Democratic gain of 589, leaving a net Republican gain of 24,411.

### THE SOUTHERN BOOM.

#### The Independence of Real Estate Men in California.

A gentleman who is now temporarily stopping in this city, and who has traveled extensively in Southern California, gave the APPEAL yesterday a few interesting points relative to the way the real estate boom was being engineered in California. He said:

"The stories seemed to me like a fairy tale, but when I visited Los Angeles I found that they were indeed true.

"The boom has not been created by Californians, as most people suppose, but by real estate men from the East. A good many came to the Grand Encampment, saw the country and its possibilities, and bought large tracts of land. These tracts they are advertising in good shape, and selling at heavy advances.

The real estate men are awfully independent. A man comes in and looks at a map. He says:

"How much are these five lots?"

"Five thousand dollars."

"Can they be got for any less?"

"Are you from San Francisco?"

"Yes."

"Thought so," says the agent as he resumes his paper.

"Levi Strauss called one day and inquired the price of some land.

"One hundred and eighty thousand dollars," was the answer.

"Can you give me a little time to think the matter over?"

"Can give you until 3 o'clock," said the agent, looking at his watch.

At 2:30 Strauss sent word to the agent to come to his room with his deeds and he would take the property.

"The word came promptly back:

"We only do business in our own office."

"Strauss hurried down, and it was ten minutes after 3 when he got there.

"I'll take that property."

"You wasn't here at 3, and we sold to other parties," was the freezing response.

"A man was there just receiving his papers and paying \$200,000 for the land.

"A friend of mine loaned a man five dollars a couple of years ago. He was broke and wanted to leave town. Last week the man met him in San Francisco and paid him back. He had cleaned up \$70,000 in real estate, starting as clerk in a real estate office.

"The streets of Los Angeles are more crowded than San Francisco, everybody on the jump, and everybody getting rich.

"When these real estate men get all the land down there sold off they will have to come up here in Nevada and give you a deal. It's as likely to spread here as anywhere."

#### Turned Bull.

John Kelly, the old Comstock bear, has concluded to drop his long worn title and mingle with the bulls. The recent developments on the Comstock have convinced him that bearing the market would not be healthy, and he has quietly slipped over to the winning side. Kelly is one of the shrewdest dealers on the coast and his late action carries with it more than ordinary significance. He is also taking more interest in the Bodie mines than for sometime past, and has stated that it was his opinion that if the Bodie mines were developed deeper good results would follow, and recommended the sinking of the old Lent shaft a distance of 200 feet.

—The Olcovich Bros. bought 10,000 acres of State land yesterday.

### SOME QUEER STATEMENTS.

#### The Journal Editor Breaks With One of His Political Pals.

The following from the Reno Journal will raise a general laugh when it is read in Nevada. The Journal of yesterday in speaking of Mr. Daggett and his alliance with the American Party says:

The sagebrush orator has cast his lot with the American party in California. This implies that he has turned his back on the party that has done so much for him and received so much in return. It is useless for Mr. Daggett to endeavor to create the impression that he was ignored and mistrusted by the Republican party in the State of Nevada. Mr. Daggett was a success as an orator—a failure as a politician. Instead of the Republican party in this State doing him an injustice, he failed in his duty and allegiance to that party. That but little confidence was reposed in him by the people, as a representative man, was not denied, but he was the author of this state of affairs. Sometime before the last political campaign became active, Rollin M. Daggett announced himself a candidate for the United States Senate. That he would have made a good race, under the circumstances, no one will deny. It was the firm desire of a large number of the Republican party that he should enter the fight and contest for that honor. Until the very last moment he made a sickly pretense of standing in, but doing nothing whatever, and in the end quietly slipped out of the contest much to the disgust of his friends, and accepted the editorship of the Enterprise for one month at the princely remuneration of \$7,500. It is now firmly believed that his pretended run was only a blind, and that the editorship of the Enterprise, and the magnificent sum paid him was the object of his Senatorial pretensions. In other words it is the impression of the people that he was paid to get out of the way. His political history is not one that will give him any prestige in the new party that has entered the field of politics. Having ruined his prospects in Nevada, politically, he turns his back upon the party that made him their Representative in Congress, and allies himself with another, not through any love for the principles it sets forth, but solely in order to carry out his political ends. The American party does not intend to gather to its folds every broken down political hack in the land and rush them into prominence, and it will be well for those worming their way into it to remember this fact. Watch yourself Mr. Daggett, for even Americans will ignore a man whom they deem unworthy of their support.

#### Olive in Nevada.

The cultivation of the olive is one of the recognized industries of our sister State, California. Owing to the peculiar nature of the tree it flourishes in the high lands or mountains where scarce anything else is cultivated. Experiments on a small scale with this fruit have been made in the Southeastern part of this State which have proved that the olive can flourish and be a source of profit in many parts of Nevada.

Adolph Flamant, of Napa, California, who has had a large experience in olive growing in France and in that State, has written a treatise on olive culture, which gives valuable information as to the mode of culture, kind of land required and the means necessary to make the industry a success. Those desirous of testing the versatility of the soil, and the practicability of introducing the olive, would gain much information by the perusal of this late practical work on the subject.

—Reno Journal.  
The publisher of the APPEAL planted two olive trees on his ranch last Fall, and they are doing well.
